Iteration 2 Progress Report

- 1) Main difficulties: One of our main difficulties was encrypting and verifying login data. It took us a lot of time to figure this part out.
- 2) Features: We implemented all required features of iteration2. There exist no features we did not implement as unplanned. We are not pushing any features that were required of this iteration to later ones.
- 3) Tests: We performed many manual tests on this iteration. This includes playing around with our buttons, reading the console errors, running requests on Postman, and others. We did not use any automated tests for this iteration.
